Textbook

[Practical Pharmacology] (in Danish)

Anton Pottegård & Tore B. Stage

A textbook in pharmacology focusing on the most essential knowledge and not the superfluous details. Contains one concentrated page of information about the 100 drug classes that are used the most (in Denmark), giving information on mechanism of action, clinical indications, side-effects and practicalities of use. The book also includes 25 clinical scenarios to be treated with over-the-counter drugs and 10 short chapters on topics that are not concisely dealt with in other textbooks such as drug-drug interactions, dietary supplements and the Danish reimbursement system.
